Task 04: Summarize the following passage (no more than 3 lines) (3 pts)

Sociology is the study of groups and group interactions, societies and social interactions, from small and personal groups to very large groups. A group of people who live in a defined geographic area, who interact with one another, and who share a common culture is what sociologists call a society. Sociologists study all aspects and levels of society. Sociologists working from the micro-level study small groups and individual interactions, while those using macro-level analysis look at trends among and between large groups and societies.
